

## Rates for road taxes in Brussels.

- The rates for the **one-off tax on entry into service** are now indexed annually. The first indexation takes into account inflation since 2019. This new provision does not apply to leased vehicles.
- The amount of **the annual road tax** remains indexed annually.

### Since 1 January 2025, a new regulation has been introduced:

As of this date, pick-up vehicles registered by individuals are taxed as cars, rather than as light utility vehicles.

### The following rates applied between 1 July 2024 and 30 June 2025:

#### Cars, cars with different purposes, minibuses

- The amount of tax on entry into service is determined either by the fiscal power (fiscal horsepower, calculated based on the cylinder capacity) or by the thermal power (in kW). Of these two parameters, the highest amount is used.
- For vehicles previously registered in Belgium or abroad, the age of the vehicle is taken into account in calculating the tax on entry into service. The age of the vehicle is determined by the first known registration date of the vehicle.
- The amount of the annual road tax is determined by the engine's fiscal power (fiscal horsepower).

You can find this information on your registration certificate.

## Tax on entry into service

### Non leasing
